TECHNICAL DATASHEET of the "STUCCO CALCE"

- Description: stucco for interior decoration.
- Main Characteristics:
 - only one coat needed for a very shining effect.
 - easy application.

OTHER CHARACTERISTICS

- Ready to use: stir carefully before application.
- Working temperature: above 10 °C.
- Tools: stainless steel rectangular trowel. The tools size can be changed according to each application requirements.
- Tools Cleaning: plain water.
- Directions for Use: smooth the surface with the "Background for Stucco Calce" (see specific datasheet); once dry apply sandpaper n. 180/220 and remove the dust with a dry brush or with a cloth damped in 94° alcohol.
Apply one coat of "Stucco Calce" on the wall carefully passing over with the clean tool to remove any stucco running. After about 4 hours, when dry, it is possible to repeat the application to increase the decorative polished effect.
- Hints: apply and remove completely without leaving any thickness.
- Drying: 6/8 hours, depending on temperature and humidity.
- Colour: white, can be tinted with universal colors; the final effect is very shining.
- Polishing process: polish the surface repeatedly passing over with the clean inox trowel, until the desired polished effect is achieved; it is important to perform this operation after applying a small quantity of "Stucco Calce" (about 1 sqm.). When dry the "Stucco Calce" can be polished with difficulty.
- Repairable: in case of damages or wall cracks, the coat of " Stucco Calce" can be repaired.
- Maintenance: for cleaning use only water and neutral soap (wait at least 3 days after the product application).
- Yield: 5-10 sqm / kg.
- Manpower: 4/5 sqm of finished wall / hour.
