TECHNICAL DATASHEET of the "STUCCO MARMORINO PLUS WATERPROOF "

- Description: stucco for interior decoration.
- Main Characteristics:
 - super-shine: the Marmorino Plus Waterproof gives a mirror-like surface
 - waterproof: wall treated with this stucco can be cleaned with water and liquid soap

OTHER CHARACTERISTICS

- Ready to use: no need to mix it with other products.
- Odorless: it can be applied in any season, even with closed windows.
- Fireproof: the product is based like our totally natural products on gypsum and water, with a minor content of synthetic resins to add the waterproof features. Our tests indicate that it is fully fireproof. We estimate that the "Nuovo Stucco Lucido Veneziano Waterproof" will be certified to comply with class 0 (maximum fire resistance).
- Working temperature: above 5°C.
- Tools: stainless steel rectangular trowel. The tools size can be changed according to each application requirements.
- Tools Cleaning: plain water.
- Directions for Use: smooth the surface with the "Plaster for Large Surfaces" (see specific datasheet); let each coat of plaster dry up for about 1 hour, smooth with sandpaper n. 180/220 and remove the dust with a dry brush. After a couple of hours apply one coat of "Background for Waterproof" (see specific datasheet). When dried up apply the first coat of "Stucco Marmorino Plus Waterproof" touching the wall at will with wide spots, and carefully removing any stucco runnings with a clean tool. After about 2 hours apply the second coat of Marmorino, using the same technique.
- Hints: apply in spots and remove the stucco completely leaving no thickness.
- Drying: 2/4 hours, depending on temperature and humidity.
- Colour: white and 7 base colours, that can be freely mixed: Lemon Yellow, Mint Green, Tropical Yellow, Smoke Gray, Venetian Red, Sky Blue, Tobacco.
- Polishing process: the best shining effect is obtained applying the second coat for 3/4 sqm, and while the stucco is still wet, polish the surface repeatedly passing over the surface with a clean trowel, until the desired shining effect is achieved. Use the trowel during the polishing action exactly like during the application action; there is no need to use it diagonally from bottom to top like generally done with synthetic products. Once dried up, the shining effect can't be increased.

SAMA di Santon Marinella

- Maintenance: for cleaning use only water and a mild liquid soap; wait at least three days from the application; don't use any type of alcoholic cleaning product.
- Yield: 15-20 sqm / liter.
- Manpower: 3-4 sqm/hour of finished wall.
- Shelf life: unlimited in a fresh room closed in the original container.

IMPORTANT NOTE

- no special tool or technique is required to remove the "Stucco Marmorino Plus Waterproof": 2 coats of standard paint are enough to cover the wall.
- never use alcohol to clean the walls treated with the "Stucco Marmorino Plus Waterproof".
