## **TECHNICAL DATASHEET of the "PLASTER for LARGE SURFACES" NORMAL, EXTRA, SUPER**

- Description: smoothing plaster for large surfaces.
- Main Characteristics:
  - Perfect for smoothing large surfaces before painting, applying tapestry or any kind of decorative stucco

### **OTHER CHARACTERISTICS**

- Ready to use: if needed just add some plain water
- Odorless: it can be applied in any season, even with closed windows.
- Non toxic: acrylic resins are infact totally absent.; in case of contact with the skin rinse with water, don't use synthetic thinners.
- Fireproof: beeing made with water and vegetal resins our tests confirm that it is fireproof; estimate that the "Stucco Marmorino Plus +" will be certified to comply with class 0 (maximum fire resistance).
- Working temperature: above 5°C.
- Tools: stainless steel rectangular trowel.
- Tools Cleaning: plain water.
- Directions for Use: remove the old paint from the wall surface; apply above the old surface (be it sand-based plaster, gypsum or gypsum board) a first coat of plaster; if improved smoothness is required wait one hour (at 18 degrees °C, at lower temperatures wait longer) before applying the second coat.
- Hints: apply thin layers.
- Drying: wait one hour at 18 C between layers; wait 2-3 hours for complete drying before using sandpaper. Time intervals change with temperature, humidiy and background characteristics.
- Colour: the normal version is light grey in the original container, alpine-white after drying; the extra version is nearly white the original container, white after drying, the super version is white in the original container, very white after drying.
- Yield: 4-5 sqm / kg, up to 7/8 sqm when diluted.
- Shelf life: unlimited in a fresh room closed in the original container. If part of the content has been used (but still undiluted), close carefully the container and the remainder will still be usable for long time.
