TECHNICAL DATASHEET for "PROCTETTOR" CREAM

- Description: specific protective cream for the "Nuovo Stucco Lucido Veneziano"
- Main Characteristics:
 - Renders waterproof any surface covered with the "Nuovo Stucco Lucido Veneziano"; ideal solution for internal walls subjected to dirt and heavy cleaning, like in public halls, restaurants, etc.

OTHER CHARACTERISTICS

- Ready to use: no need to mix it with other products, not even to color it.
- Working temperature: 18/20 °C.
- Tools: when the product is fluid use a cloth; otherwise use a stainless steel rectangular trowel.
- Tools Cleaning: hot water.
- Directions for Use: can be used out of the box, but if it is not fluid enough, heat a little using the bain-marie technique; apply first uniform coat removing any excess thickness; when dried up (after about 4 hours) apply the second coat.
- Hints: apply quickly without allowing the cream to dry up during the application.
- Drying: 4 hours between coats, depending on temperature and humidity; 10 days are needed to fully develop its waterproof characteristics.
- Colour: neutral.
- Repeated applications: the cream application can be repeated at will.
- Yield: 25 sqm/liter.
- Manpower: 7/8 sqm/hour.
- Shelf life: unlimited in a fresh room closed in the original container.

IMPORTANT NOTE

The cream is highly flammable; ventilate well the room during the application.
